# LIMITLESS IIOT CONNECTIVITY

Machine monitoring without limits!

*Clouver, the IIoT production monitoring platform, collects, analyses, and visualises the data of every machine - from raw material to finished product!*

# UNLIMITED FLEXIBILITY

You decide what you need!

*Clouver has a modular structure in terms of both hardware and software functions. Each customer selects the functions they need for their individual requirements.*

## BENEFITS

- ▶ Networking and full data evaluation of all machines in real-time
- ▶ Up to 12% less machine downtime
- ▶ Up to 8% personnel cost savings thanks to better data and information management
- ▶ Cost reduction through proactive maintenance and repair planning
- ▶ First-class advice and support from ProCom Automation's team of experts
- ▶ Quality assurance

## Basic Modules

- ▶ User administration
- ▶ Device management
- ▶ Dashboarding
- ▶ Visualisation of the OEE

## Optional Modules

- ▶ Maintenance Monitor
- ▶ Real-time data processing
- ▶ Detailed filter module

# LIMITLESS NETWORKING

One solution for all machine types!

*Thanks to the unique solution of the Clouver SmartKit, IoT networking is also possible with old and heterogeneous machines. Installation is completed within 60 minutes.*

## FREE LIVE DEMO!

**In 30 minutes you will receive exclusive information from our IIoT-experts on site:**

- ▶ Insight into the Clouver platform with its dashboards and numerous features
- ▶ Presentation of how the apps and widgets work and how to use them
- ▶ Brief analysis of your production and initial ideas for implementing your individual IIoT solution
